Full-Stack Developer with 4 years of experience in developing and maintaining software applications. Experienced in improving existing systems, streamlining business processes, and developing solutions based on business requirements. Skilled in building practical and user-friendly applications with a focus on reliability, scalability, and maintainability.

EXPERIENCE

Full-Stack Developer

Philsoft Technologies Group, Inc. - Shaw Blvd, Pasig

November 2023 - May 2027

Develop customized software solutions for various business platforms. Design and build systems from initial requirements gathering and analysis through development, testing, deployment, and technical support. Responsible for implementing solutions in different business environments and handling hardware system requirements, upgrades, and maintenance when required.

Key Responsibilities and Expertise:

- Develop and maintain business applications such as **Accounting System, Savings and Loan System, Real Estate Management System, Document Tracking System, Information System, Library Management System, Billing Monitoring System, Time Attendance Monitoring System and Payroll System.**
- Understand and analyze business workflows related to financial transactions, loan processing, property management, and ERP systems operations, ensuring alignment with country industry standards.
- Design and develop web-based applications using **ASP.NET, C#, VB6**, with front-end technologies including HTML, CSS, Bootstrap, Tailwind, jQuery, and reporting tools such as SAP Crystal Reports.
- Possess strong knowledge in creating and optimizing database queries, stored procedures, and reports to manage accounting, financial records, and complex data processing.
- Install and deploy systems on servers, and provide technical support for daily operations and transactional processes.
- Collaborate with end-users and cross-functional teams to gather requirements and translate them into efficient system features.
- Conduct system testing to ensure reliability, performance, and accuracy, and train end-users on functionality and workflows to maximize adoption and efficiency.
- Ensure system security, data integrity, and adherence to organizational IT standards. Designed and implemented financial and management systems for government and cooperative institutions in the Philippines, including large-scale organizations such as **Philippine National Construction Corporation, Philippine Carabao Center, Philippine National Police - LTMPC, Supreme Court - SLAI.**

Web Developer

Freelancer
